Air Force Research Laboratory

www.afrl.af.mil

The United States Air Force Research Laboratory (AFRL) leads the discovery, development, and integration of affordable warfighting technologies. The AFRL is a full-spectrum laboratory of approximately 9,500 people, responsible for planning and executing the Air Force's entire science and technology budget of nearly \$1.7 billion, including basic research, applied research, and advanced technology development. AFRL partners include universities and industry with whom the AFRL invests almost 80 percent of its budget; customers include the Air Force major commands, which operate and maintain the Air Force's weapon systems.

National Aeronautics and Space Administration

www.nasa.gov

The National Aeronautics and Space Administration (NASA) conducts its

work in four principle organizations, called mission directorates: aeronautics, exploration systems, science, and flight support. Closer to home, NASA's aeronautics team is working with other government organizations, universities, and industry to fundamentally improve the air transportation experience.

Practical Software and Systems Measurement Support Center

www.psmc.com

The Practical Software and Systems Measurement (PSM) Support Center is sponsored by the Department of Defense (DoD) and the U.S. Army. It provides project managers with the objective information needed to successfully meet cost, schedule, and technical objectives on programs. PSM is based on actual measurement experience with DoD, government, and industry programs. The Web site also has the most current version of the *PSM Guidebook*.
